

# Asset Detail Page

Clicking on an asset card from the Assets Gallery opens the Asset Detail page. The breadcrumb navigation shows the path: Home > Assets > [Asset ID].

The Asset Details section displays comprehensive information about the detected asset. The left column includes the Asset ID (the container or chassis identification number), Project (the associated project name), Scan Time (the date and time the asset was captured), Asset Type (the classification of the identification), Processing Time (when the backend completed analysis), Status Code (e.g., A0 for a successful read), and Asset Heading (the direction the asset was facing relative to the camera, e.g., R2L for right-to-left).

The right column displays the Asset Image, which is a cropped photograph of the detected asset extracted from the video frame, and the Asset Location, which shows the GPS coordinates of the capture plotted on an embedded map.

Three action buttons appear in the top-right corner of the detail section: **Correct** (to confirm the asset was correctly identified), **Incorrect** (to flag an identification error), and **Options** (for additional actions).

The screenshot shows the SiteTrax.io interface. On the left is a navigation sidebar with links for Dashboard, Videos, Assets, Reports, and Projects. The main content area is titled 'Asset Details' for asset ID B540125. It lists the following information:

- Asset ID: B540125
- Project: [Redacted]
- Scan Time: April 16th 2026, 8:33 am
- Asset Type: Trailer ID
- Processing Time: April 16th 2026, 8:42 am
- Status Code: A0
- Asset Heading: R2L

On the right side of the details, there is an 'Asset Image' showing a white trailer with a SiteTrax.io logo and a '53' on its side. Below the image is an 'Asset Location' map showing the intersection of South Fontana and Slover Ave, with a red dot indicating the asset's position. In the top right corner of the details section, there are three buttons: 'Correct', 'Incorrect', and 'Options'.

Revision #3
