Assets Gallery

> **Retired page.** This documents the legacy SiteTrax.io service portal, which has been replaced by **SiteTrax.io Intelligence** at app.sitetrax.io. It is kept for reference only and is no longer maintained. For current guidance, see the SiteTrax.io Intelligence shelf.

The Assets page displays all detected assets in a card-based grid layout. Each asset card shows a thumbnail image of the captured asset, the Project name, the date and time of detection, a status tag (e.g., "Exiting" with a directional arrow), the Asset ID (the container or chassis number), and the Asset Type (e.g., International Intermodal Vertical ID, International Intermodal Horizontal ID).

Each card also includes icon buttons for viewing the associated video clip and for deleting the asset record. Assets are displayed in reverse chronological order, with the most recently detected assets appearing first. Pagination controls at the bottom allow users to navigate through all results.

A "Filter Exceptions" toggle is available in the toolbar, allowing users to quickly filter the view to show only assets that may require manual review or have been flagged as exceptions. The standard date range, time period, and project filters are also available at the top of the page.
