

Assets Gallery

The Assets page displays all detected assets in a card-based grid layout. Each asset card shows a thumbnail image of the captured asset, the Project name, the date and time of detection, a status tag (e.g., "Exiting" with a directional arrow), the Asset ID (the container or chassis number), and the Asset Type (e.g., International Intermodal Vertical ID, International Intermodal Horizontal ID).

Each card also includes icon buttons for viewing the associated video clip and for deleting the asset record. Assets are displayed in reverse chronological order, with the most recently detected assets appearing first. Pagination controls at the bottom allow users to navigate through all results.

A "Filter Exceptions" toggle is available in the toolbar, allowing users to quickly filter the view to show only assets that may require manual review or have been flagged as exceptions. The standard date range, time period, and project filters are also available at the top of the page.

The screenshot displays the SiteTrax.io Assets Gallery. The interface features a sidebar on the left with navigation options: Dashboard, Videos, Assets (selected), Reports, and Projects. The main content area is titled "Assets" and shows a grid of 12 asset cards. Each card includes a thumbnail image, a date and time stamp, a status tag (e.g., "Entering" or "Exiting" with a directional arrow), and an Asset ID (e.g., B540185, B540125, B488215, B53854R, B539425, R531575, B54066S, B533375, B539235, R53868R, B54027R, R53030S). The cards are arranged in a 4x3 grid. At the bottom of the grid, there is a pagination bar showing "Showing 1 to 104 of 7524 results" and a page number "1" with navigation arrows.
