# Project Detail Page

> **Retired page.** This documents the legacy SiteTrax.io service portal, which has been replaced by **SiteTrax.io Intelligence** at app.sitetrax.io. It is kept for reference only and is no longer maintained. For current guidance, see the SiteTrax.io Intelligence shelf.

The Project Detail page provides a comprehensive view of a single project's configuration and status. At the top of the page, the project name is displayed along with its status badge (e.g., "Active" with a green checkmark indicator).

Below the project name, three navigation tabs allow quick access to the project's Dashboard, Videos, and Assets views, which display the same data as the main Dashboard, Videos, and Assets pages but filtered to only this project.

An **Invite** button in the top-right corner allows project administrators to invite new users by email. A QR code icon next to it can generate a QR code for the project, which may be used for quick configuration of capture devices.
