

Project Detail Page

The Project Detail page provides a comprehensive view of a single project's configuration and status. At the top of the page, the project name is displayed along with its status badge (e.g., "Active" with a green checkmark indicator).

Below the project name, three navigation tabs allow quick access to the project's Dashboard, Videos, and Assets views, which display the same data as the main Dashboard, Videos, and Assets pages but filtered to only this project.

An **Invite** button in the top-right corner allows project administrators to invite new users by email. A QR code icon next to it can generate a QR code for the project, which may be used for quick configuration of capture devices.

The screenshot displays the SiteTrax.io Project Detail Page for a project named "Site X Test Project". The page is structured as follows:

- Header:** Shows the project name "Site X Test Project" and its status "Active" with a green checkmark. Navigation tabs for "Dashboard", "Videos", and "Assets" are present. An "Invite" button and a QR code icon are in the top right.
- Current Usage:** A section titled "Current Usage" for the period "From Mar 31, 2026 to Apr 30, 2026". It shows a usage of "0/100" and "100 Scans remaining for 15 days". A link "How is my usage calculated" is provided.
- Users:** A section titled "Users" with the text "These users have access to this project." It lists one user: "You" with a red 'x' icon to remove access.
- Integrations:** A section titled "Integrations" with the text "Google spreadsheets and REST APIs." and a plus sign to add more. Under "Spreadsheets", one integration "Site X Test Project" is listed.

The left sidebar contains the SiteTrax.io logo, a search bar, and navigation links for Dashboard, Videos, Assets, Reports, and Projects. The footer shows "© 2026 SiteTrax.io - v2.6.1".
