

# Video Detail Page

Clicking on a video name from the Videos list opens the Video Detail page. This page is divided into two main sections: Video Metadata and Found Assets.

The breadcrumb navigation at the top of the page shows the path: Home > Videos > [Video Name].

The Video Metadata section displays detailed technical information about the video file, including the Video Name (the original filename), Time Added (the timestamp when the video was received by the platform), Project (the associated project name), Resolution (e.g., 1920 x 1080), Frame Rate (e.g., 15 fps), Length (the video duration in seconds), Time Taken (the wall-clock processing time in seconds), and Size (the file size in MB).

Two action buttons are available in the top-right corner of the metadata section: **Download** (to save the original video file) and **Play** (to view the video in the browser).

The screenshot displays the SiteTrax.io interface. On the left is a sidebar with navigation links: Dashboard, Assets, Reports, and Projects. The main content area shows the breadcrumb path: Home / Videos / video26-04-16\_08-37-00-13\_01586.mkv. Below this is the 'Video Metadata' section, which includes a 'Download' button and a 'Play' button. The metadata is presented in a table-like format:

Video Name	video26-04-16_08-37-00-13_01586.mkv	Time Added	2026-04-16T08:38:39.850002-04:00
Project	[Redacted]	Resolution	3840 x 2160
Frame Rate	30 fps	Length	97.0 seconds
Time Taken	324 seconds	Size	40.3 MB

Below the metadata is the 'Found 1 Assets' section, which shows a single asset with a thumbnail and the text 'Trailer ID'.

Revision #3
